RE: annual testing

We had our annual test in May of 2012 and did a comprehensive test of our core and auxiliary applications. We also tested our connection to United Financial Services via the satellite phone.

In June of 2012, we had our safety & soundness FDIC exam. The examiner looked at our annual test results and liked the depth of our test and the documentation of the results. It was great to hear that this covered our disaster test requirements for the exam.

We have been with Recovery Solutions for a couple of years and it is a pleasure working with all of the staff.

Sincerely,

Laurie Peterson
Asst. Operations Officer
