

# RECOVERY SOLUTIONS

*"Recovery Solutions is truly an awesome "recovery solution." The evolution of our disaster recovery process and plan would not have happened without the cooperation and expertise of Recovery Solutions and Fiserv. The Dedicated MPLS Circuit connection between Recovery Solutions and Fiserv is simply amazing. We are extremely confident in the ability of Recovery Solutions to recover our systems in the event of a real disaster. "*

- Mike Lee, First National Bank at Darlington

Recovery Solutions provides a fleet of mobile bank facilities specifically configured to the needs of the financial industry. This mobile bank facility becomes a branch facility complete with all technology, communications and ability to restore virtual images of critical devices. Along with our sophisticated satellite-based technology system, we offer a true turnkey solution providing your institution with planning, virtualization, recovery options, technical and compliance support to ensure that your annual test successfully recovers your critical systems and business functions which will meet your defined recovery time objectives.

We have over 125 combined years of financial industry experience in all aspects of bank regulatory business continuity and disaster recovery compliance, technology and risk management practices. Since 2005, our ultimate focus has been to dedicate our expertise to the financial industry and deliver a comprehensive business resumption and disaster recovery service. From the time of engagement, Recovery Solutions will assist you with creating a comprehensive road map to business resumption. We have proven our ability to completely restore critical business functions within hours of actual disaster situations.

## Enhanced Fiserv Communication Capabilities for Disaster Recovery Testing and Business Resumption:

- Delivering a high speed encrypted satellite communications network over a Fiserv dedicated MPLS circuit to provide secure access to your data and applications anywhere anytime.
- The ability to test Cleartouch® and Premier® Bank Platforms and various Fiserv applications in a simulated disaster environment outside of your financial institutions network and within a mobile bank facility.
- The ability to test other third party applications used by your institution resulting in a true disaster simulation exercise.
- Enables critical data to be encrypted and automatically transmitted to a secure, electronic storage vault – on premise, in the cloud or both.
- Recovery Solutions and Fiserv provide extensive expertise to document business resumption planning and testing activities consistent with regulatory mandates.
